

## Photographic documentation and distribution-maps of key-mushrooms species associated with *A. glutinosa* stands in Andros

Research and Photographs by **Elias Polemis**

Preparation of maps by **Vassilios Goritsas**

Edited by **Georgios I. Zervakis**

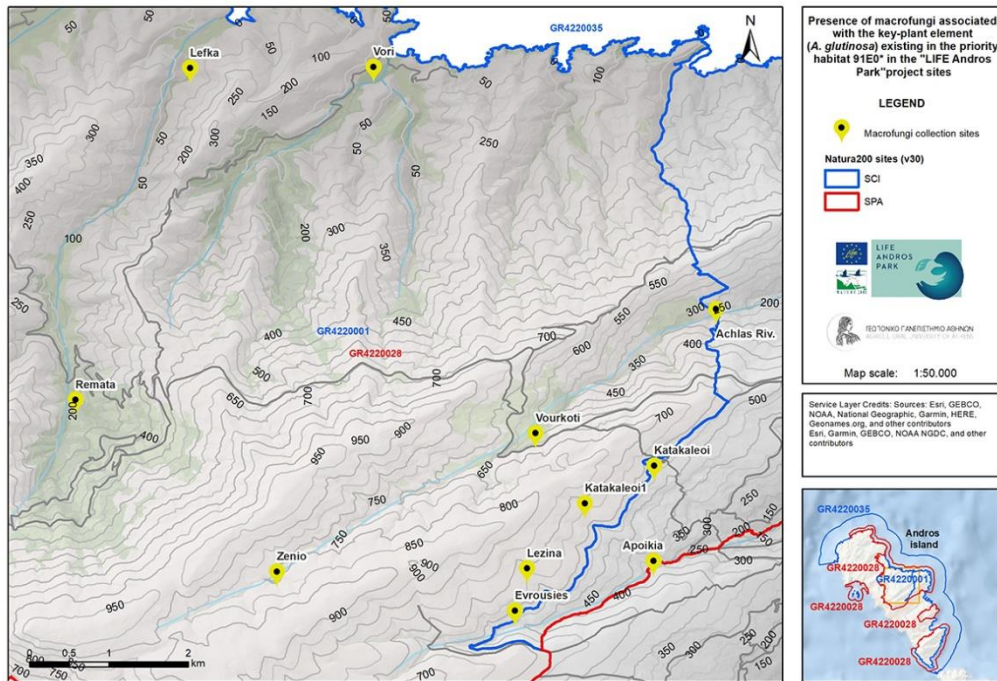

AGRICULTURAL UNIVERSITY OF ATHENS  
LABORATORY OF GENERAL AND AGRICULTURAL MICROBIOLOGY

Summary of contents: In the frame of the Preparatory Action A.1 “Determination of vegetation structure and plant (plus associated fungal) species diversity in priority terrestrial habitat (91E0\*)”, all mushrooms species recorded in the forays performed during 2017-2018 were photographed in situ and they are depicted in the present document (Deliverable titled “Photographs, videos and other documentation concerning mushrooms associated with *A. glutinosa* stands of Andros for project dissemination and public awareness”). In addition, emblematic species collected, photographed and identified in previous years, also associated with alders or found in the littoral zone of the alluvial valleys of Vori and Lefka, are also presented. Moreover, distribution maps showing the site/sites where these species were recorded, are included in the Deliverable. These maps include all existing records since 1995; more details regarding their occurrence are included in the Deliverable titled “Checklist of macrofungi associated with the key-plant element (*A. glutinosa*) existing in the priority habitat 91E0\*”.

Περίληψη περιεχομένων: Στα πλαίσια της Δράσης Α.1 με τίτλο “Προσδιορισμός της δομής της βλάστησης και της ποικιλότητας των φυτικών ειδών (συμπεριλαμβανομένων και των σχετιζόμενων μυκήτων) στον οικότοπο προτεραιότητας (91E0\*)”, όλα τα είδη μανιταριών που καταγράφηκαν στις εξορμήσεις της περιόδου 2017-2018 φωτογραφήθηκαν στο πεδίο και παρουσιάζονται στο παρόν αρχείο (Παραδοτέο με τίτλο “Φωτογραφίες, βίντεο και λοιπή τεκμηρίωση που αφορά μανιτάρια που σχετίζονται με τις συστάδες *A. glutinosa* της Άνδρου για τη διάχυση των αποτελεσμάτων του έργου και την ευαισθητοποίηση του κοινού”).

Επιπλέον, παρουσιάζονται επιλεγμένα εμβληματικά είδη που συλλέχθηκαν, φωτογραφήθηκαν και ταυτοποιήθηκαν κατά τη διάρκεια παλαιότερων ετών, τα οποία επίσης σχετίζονται με τα σιλήθρα ή εντοπίστηκαν στη παραθαλάσσια ζώνη των αλλουβιακών κοιλάδων της Βόρης και της Λεύκας. Επιπροσθέτως, στο παρόν Παραδοτέο επισυνάπτονται χάρτες που εμφανίζουν τη βιοκατανομή των εν λόγω ειδών στην Άνδρο. Οι συγκεκριμένοι χάρτες περιλαμβάνουν όλες τις καταγραφές μακρομυκήτων που έγιναν από το 1995. Περισσότερες σχετικές λεπτομέρειες περιλαμβάνονται στο Παραδοτέο με τίτλο “Κατάλογος των μακρομυκήτων που σχετίζονται με το φυτικό είδος *A. glutinosa* στον οικότοπο προτεραιότητας 91E0\*”.

## Collection sites for specimens of macrofungi

## *Abortiporus biennis* (Bull.) Singer

## *Agaricus pampeanus* Speg.

## *Armillaria gallica* Marxm. & Roma

*Armillaria mellea* (Vahl) P. Kumm.

## *Auricularia auricula-judae* (Bull.) Quél.

## *Botryobasidium candicans* J. Erikss.

## *Brevicellicium olivascens* (Bres.) K.H. Larss. & Hjortstam

## *Calocera cornea* (Batsch) Fr.

## *Ceriporia purpurea* (Fr.) Donk

## *Clitocybe nebularis* (Batsch) P. Kumm.

## *Clitocybe phyllophila* (Pers.) P. Kumm.

## *Coprinellus flocculosus* (DC.) Vilgalys, Hopple & Jacq. Johnson.

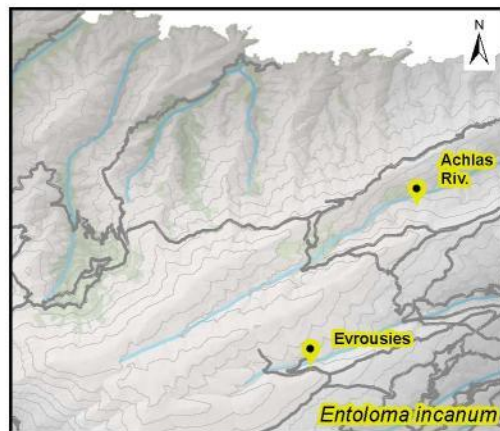

## *Corioloopsis gallica* (Fr.) Ryvarden

## *Entoloma incanum* (Fr.) Hesler

## *Fibroporia citrina* (Bernicchia & Ryvarden) Bernicchia & Ryvarden

## *Gymnopilus arenophilus* A. Ortega & Esteve-Rav.

## *Gymnopus amygdalisporus* Polemis & Noordel.

## *Gymnopus brassicolens* (Romagn.) Antonín & Noordel.

## *Gymnopus dysosmus* Polemis & Noordel.

## *Gyrodon lividus* (Bull.) Sacc.

## *Hyphoderma medioburiense* (Burt) Donk

## *Hyphoderma setigerum* (Fr.) Donk

## *Hyphodermella corrugata* (Fr.) J. Erikss. & Ryvarden

## *Lactarius obscuratus* (Lasch) Fr.

## *Lepista nuda* (Bull.) Cooke

## *Leucopaxillus gentianeus* (Quél.) Kotl.

## *Melanoleuca excissa* (Fr.) Singer

## *Merulius tremellosus* Schrad.

## *Mycena pseudocorticola* Kühner

## *Naucoria celluloderma* P.D. Orton

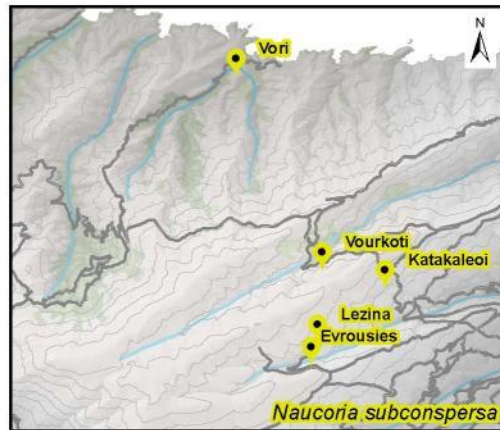

## *Naucoria escharioides* (Fr.) P. Kumm.

## *Naucoria luteofibrillosa* (Kühner) Kühner & Romagn.

## *Naucoria subconspersa* Kühner ex P.D. Orton

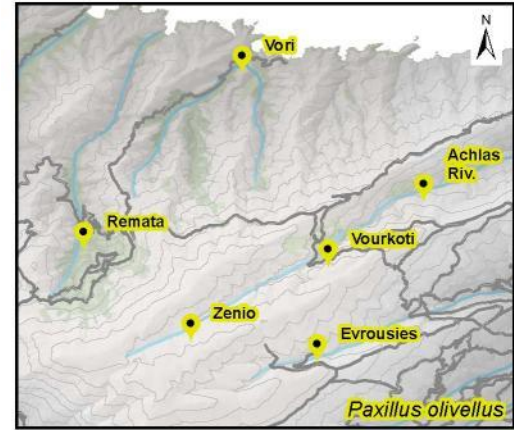

## *Paralepista flaccida* (Sowerby) Vizzini

## *Parasola kuehneri* (Uljé & Bas) Redhead, Vilgalys & Hopple

## *Paxillus olivellus* P.-A. Moreau, J.-P. Chaumeton, Gryta & Jarge

## *Peniophora rufomarginata* (Pers.) Bourdot & Galzin

## *Peniophorella praetermissa* (P. Karst.) K.H. Larss.

Zenio: 11 November 2017

## *Phallus hadriani* Vent.

## *Phlebia rufa* (Pers.) M.P. Christ.

## *Phloeomana speirea* (Fr.) Redhead

## *Pilatotrama ljubarskyi* (Pilát) Zmitrovich

## *Pleurotus ostreatus* (Jacq.) P. Kumm.

## *Psathyrella almerensis* Kits van Wav.

## *Russula pumila* Rouzeau & F. Massart

## *Steccherinum ochraceum* (Pers. ex J.F. Gmel.) Gray

## *Trametes versicolor* (L.) Lloyd

## *Vitreoporus dichrous* (Fr.) Zmitr.

## *Volvopluteus gloiocephalus* (DC.) Vizzini, Contu & Justo

## *Xylodon raduloides* Riebesehl & Langer
